Both the AECOM staff that will be on the boat have significant experience performing probing of sediments and one of the staff has previous experience performing probing of sediments on the LPR.

Our schedule is to start on Monday (we have contacted CDM Smith and arranged to meet with them at 8:00 at the CPG dock). We plan to be done by Friday if Marcia does not add too many locations.

Rob,

I will take a look and see if we need to add additional probing locations based on proposed core locations to see if we need to resubmit the mod.

I do know that the AECOM staff have experience, I believe one or both of them have probed the LPR before.

I will be available to get on the boat around 10:30 on Tuesday, I can meet up with Stephanie and we can get picked up mid-late morning.

Spoke to Stephanie and Ray:

1. For those areas where previous probing has been conducted - the only additional probing is required in the vicinity of the proposed core locations.
2. Push cores are not required; the AECOM prober (not something I want on my resume) has to be experienced (with previous LPR experience preferably)
3. Stephanie would like to be on the boat on Tuesday or Wednesday for a couple of hours. Marcia were you going to observe on Tuesday for few hours? Could you accompany her on Tuesday?
4. They would like a schedule for the probing
5. Do we need to resubmit the Field Mod?
